

# INTEOS<sup>®</sup> Radiussystem 2.5

Delicate and extra flat design

# Advantages of the INTEOS® Radiussystem 2.5

The new INTEOS® radius system from Hofer Medical is characterised by its delicate design, while maintaining maximal stability. Determining factors for this are the minimised screw diameter and the curved outline of the shaft.

- + extra flat design
- + completely submersible screw heads as a result of higher multidirectional angle stability
- + pre-defined alignment of the plate holes with the aim of supporting all screws in the distal and proximal lines subcortically and dorsally

## creating partnership

For us, a partnership is the result of a long and happy relationship in all areas of our work. Reliable bone healing for patients, optimal handling of the systems for surgeons and surgical personnel, as well as the simple preparation of the instruments, constantly strengthen this partnership.

For us, "creating" means more than just finding solutions in the form of innovative products.

It is the result of high standards, constant development, innovative products and excellent service for patients, surgeons and surgical personnel around the clock.

Please do not hesitate to contact us if you have questions about our company, our employees or our production methods.
